

# Vaccination Phase Information

- We are still vaccinating healthcare workers and first responders to finish phase 1A
- Next week we will begin Phase 1B by starting vaccinations on residents over age 80
- Not every person over age 80 will be vaccinated next week as we currently have 102 people on our list and we are only receiving 100 doses of vaccine per week
- The Health Department is committed to getting the vaccine out as quickly as possible according to the state plan
- Our drive-thru clinic is working very smoothly, we will call those on our list to schedule them as we receive doses of the vaccine to use
